1 **I. INTRODUCTION**

2 Without a license to do so, Counterclaimant Psystar Corporation (“Psystar”) has installed  
3 Apple’s Mac OS® on Psystar’s computers so they operate “like that of a Macintosh from APPLE” and  
4 sells them in competition with Apple. (Counterclaims ¶ 16.) By doing so, Psystar has knowingly  
5 infringed Apple’s copyrights. In addition, Psystar also knew of Apple’s trademarks, including the one  
6 for Mac® (Answer ¶ 8), and yet initially decided to call its computers “OpenMac” (*Id.* ¶ 12). In this  
7 and other ways Psystar has infringed Apple’s trademarks. Now, Psystar tries to divert attention from  
8 its infringing acts by asserting deeply flawed antitrust counterclaims.

9 Psystar argues that its antitrust and unfair competition claims should proceed even though the  
10 allegations in the Counterclaims contradict its crucial assertion that there is a relevant product market  
11 limited to Apple’s own Macintosh® Operating System (“Mac OS”), and even though the Supreme  
12 Court has significantly tightened the standard for pleading claims under the antitrust laws. Psystar  
13 argues that the Ninth Circuit permits antitrust claims alleging a “single-brand” market to proceed, but  
14 fails to recognize that those cases are limited to rare circumstances involving “aftermarkets” not, as  
15 here, the primary market for a product. Indeed, courts have dismissed cases before discovery in which  
16 the claimant has asserted a single-brand primary market when, as in this case, such an allegation is  
17 “implausible.”

18 Psystar does not deny that the very products it sells — now called the Open Computer and  
19 OpenPro Computer — are sold to consumers with their choice of operating systems: Windows XP,  
20 Windows Vista, Linux or Mac OS. (*See* Counterclaims ¶ 15.) These operating systems are being  
21 offered to the same consumers, for the same purpose, through the same seller at similar prices.  
22 Consequently, they necessarily are in the same product market. Psystar’s own allegations demonstrate  
23 that its effort to define a single-brand market must be rejected and its antitrust and unfair competition  
24 claims dismissed with prejudice.

25 **II. ARGUMENTS AND AUTHORITIES**

26 **A. Psystar Improperly Relies Upon An Abrogated Legal Standard**

27 The United States Supreme Court clarified and tightened the standards required to successfully  
28 plead a viable antitrust claim in *Bell Atlantic Corp. v. Twombly*, \_\_\_ U.S. \_\_\_, 127 S. Ct. 1955, 167 L.

1 Ed. 2d 929 (2007). As recognized by the Ninth Circuit three months ago, “[a]t least for the purposes  
2 of adequate pleading in anti-trust cases, the [Supreme] Court specifically abrogated the usual ‘notice  
3 pleading’ rule” and “retired” the standard set forth in *Conley v. Gibson*, 355 U.S. 41, 45-46, 78 S. Ct.  
4 99, 2 L. Ed.2d 80 (1957). *Rick-Mik Enterprises Inc. v. Equilon Enterprises, LLC*, 532 F.3d 963, 970-  
5 71 (9th Cir. 2008). Psystar ignores this important development in the law, asserting it need only  
6 allege facts from which the Court might “discern the elements of an injury resulting from an act  
7 forbidden by antitrust laws.” (Psystar’s Opposition Brief (“Opp.”) at 2, citing *Newman v. Universal*  
8 *Pictures*, 813 F.2d 1519, 1521-22 (9th Cir. 1987).) This is wrong. *Twombly* requires more – it  
9 requires plausible claims.

10 Psystar further misconstrues *Twombly* to require dismissal only in cases where no specific  
11 factual allegations are included in the pleading. That also is wrong. In *Twombly* the plaintiff asserted  
12 numerous specific factual allegations. *See* 127 S. Ct. at 1962-63. Nevertheless, the Supreme Court  
13 dismissed the antitrust claims because those allegations did not meet the “plausibility” standard,  
14 stating that “[f]actual allegations must be enough to raise a right to relief above the speculative level  
15 on the assumption that all the complaint’s allegations are true.” *Id.* at 1959; *see also id.* at 1970  
16 (holding that “nothing contained in the complaint invests either the action or inaction alleged with a  
17 plausible suggestion of conspiracy”). Similarly in *Rick-Mik*, the Ninth Circuit held that even though  
18 the plaintiff made numerous factual allegations about market power and the separateness of the  
19 alleged tied and tying products, those allegations still failed to meet *Twombly*’s plausibility standard.  
20 *Rick-Mik*, 532 F.3d at 973, 975. Here, as in *Twombly* and *Rick-Mik*, Psystar’s counterclaims should be  
21 dismissed because they simply do not support a plausible antitrust claim.

## 22 **B. Numerous Courts Have Dismissed Complaints For Failing To Plead A Plausible** 23 **Relevant Product Market**

24 Psystar contends that a Rule 12(b)(6) dismissal is precluded because defining the relevant  
25 market is a fact-laden question for the jury. (Opp. at 9-10.) This same argument has been rejected by  
26 numerous courts,<sup>1</sup> including the Ninth Circuit in *Tanaka v. University of Southern California*, 252

---

27 <sup>1</sup> *See, e.g., Bruce Chapman and Handle With Care Behavior Management System, Inc. v. New York*  
28 *State Division For Youth*, No. 05-7010-CV, \_\_\_ F.3d \_\_\_, slip op. at 15-16 (2d Cir. Oct. 14, 2008)

1 F.3d 1059, 1063-64 (9th Cir. 2001). In *Tanaka*, the Ninth Circuit affirmed dismissal of the complaint  
 2 in part because it found that the plaintiff “ha[d] failed to identify an appropriately defined product  
 3 market. Her conclusory assertion that the ‘UCLA women’s soccer program’ is ‘unique’ and hence  
 4 ‘not interchangeable with any other program in Los Angeles’ is insufficient.... Moreover, [the  
 5 plaintiff’s] limitation of the relevant product market to a single athletic program is especially  
 6 unavailing insofar as the very existence of any given intercollegiate athletic program is predicated  
 7 upon the existence of a field of competition composed of other, similar programs.” *Id.*

8 Like *Tanaka*, many dismissed complaints involved implausible attempts to limit a product  
 9 market to a single brand. See, e.g., *Hack v. President & Fellows of Yale Coll.*, 237 F.3d 81, 86-87 (2d  
 10 Cir. 2000) (limited to Yale University); *Queen City Pizza, Inc. v. Domino’s Pizza, Inc.*, 124 F.3d 430,  
 11 438 (3rd Cir. 1997) (limited to goods approved by Domino’s Pizza for Domino’s stores); *Spahr v.*  
 12 *Leegin Creative Leather Products, Inc.*, 2008 WL 3914461 (E.D. Tenn. Aug. 20, 2008) (limited to  
 13 Leegin’s brand of handbags and accessories); *Westerfield v. Quizno’s Franchise Co.*, 527 F. Supp. 2d  
 14 840, 857 (E.D. Wis. 2007) (limited to Quizno’s Franchises); *Re-Alco Indus., Inc. v. Nat’l Ctr. for*  
 15 *Health Educ., Inc.*, 812 F. Supp. 387, 391-92 (S.D.N.Y. 1993) (limited to one particular brand of  
 16 health education materials); *Theatre Party Assocs. v. Shubert Org.*, 695 F. Supp. 150, 153-55  
 17 (S.D.N.Y. 1988) (limited to “Phantom of the Opera” tickets); *Shaw v. Rolex Watch, U.S.A., Inc.*, 673  
 18 F. Supp. 674, 678-79 (S.D.N.Y. 1987) (limited to Rolex). Psystar’s attempt to limit the relevant  
 19 market to a single product, Mac OS, is equally flawed and likewise should be rejected.

20  
 21  
 22 \_\_\_\_\_  
 Continued from the previous page

22 (“Though market definition is a deeply fact-intensive inquiry . . . , the relevant market is legally  
 23 insufficient” where “plaintiffs’ proposed relevant market does not encompass all interchangeable  
 24 substitute products”) (internal citations, quotation marks and brackets omitted) (attached as Exhibit 2  
 25 to Reply Declaration of James G. Gilliland, Jr.) (“Gilliland Reply Decl.”); *Aquatherm Indus., Inc. v.*  
 26 *Florida Power & Light Co.*, 145 F.3d 1258, 1261 (11th Cir. 1998) (affirming dismissal of the antitrust  
 27 claims in the complaint); *McCabe Hamilton & Renny, Co., Ltd. v. Matson Terminals, Inc.*, 2008 WL  
 28 2437739 (D. Haw. June 17, 2008) (granting a Rule 12(b)(6) motion to dismiss antitrust claims because  
 the complaint failed to provide any fact to explain why the market should be so limited); *E & E Co.*  
*Ltd. v. Kam Hing Enters., Inc.*, 2008 WL 1924905, at \*1 (N.D. Cal. Apr. 29, 2008) (J. Chesney)  
 (same); *UGG Holdings, Inc. v. Severn*, 2004 WL 5458426, at \*3-4 (C.D. Cal. Oct. 1, 2004)  
 (dismissing with prejudice antitrust claims for failing to allege a viable relevant product market).

1           **C.     Psystar’s Allegations Establish There Cannot Be A Single-Brand Market Here**

2                   **1.     The Ninth Circuit’s “Aftermarket” Cases Do Not Help Psystar**

3           Relying on *Newcal Industries, Inc. v. Ikon Office Solutions*, 513 F.3d 1038 (9th Cir. 2008), and  
4 two other Northern District cases currently pending against Apple, Psystar argues that it is possible to  
5 restrict the relevant market to a single brand of the product at issue. Psystar ignores, however, that  
6 courts only allow such single-brand markets where the antitrust plaintiff can establish “aftermarkets”  
7 in which consumers already are “locked in” to a particular brand of product. No such allegations are  
8 or could be made here.

9           *Newcal* is an aftermarket case. Psystar misleadingly cites one aspect of the case and ignores  
10 other fundamental holdings that show its claims fail. Like *Eastman Kodak Co. v. Image Technical*  
11 *Services, Inc.*, 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992), *Newcal* involved two  
12 different types of markets—the primary market (copier equipment) and an aftermarket (replacement  
13 parts and services). *Newcal*, 513 F.3d at 1043; *Kodak*, 504 U.S. at 456-59. The primary market for  
14 copier equipment was indisputably a competitive market, and the aftermarket was the alleged relevant  
15 market at issue. *Newcal*, 513 F.3d at 1049 n.5. The Ninth Circuit held that in very limited  
16 circumstances an aftermarket consisting exclusively of a single brand could survive a motion to  
17 dismiss. *Id.* at 1049-51. Those circumstances are not alleged here.

18           The *Newcal* Court enumerated the unusual factors that must be alleged and then proven to  
19 show a single-brand aftermarket, none of which exist here. First, the Court of Appeals was clear that  
20 it was only discussing aftermarkets and not the primary competitive market. *Id.* at 1049 (“All...of  
21 these cases involve aftermarkets.”). Second, the alleged anticompetitive conduct must relate only to  
22 the aftermarket and “[c]ritically” not to a product that is “part of the [competitive] initial market.” *Id.*  
23 at 1050 (contrasting *Queen City Pizza* where claimant knowingly agreed to buy pizza supplies from  
24 Dominos when the franchise agreement was executed); *see also Kodak*, 504 U.S. at 455. Third, the  
25 court stated that market power that “flows from contractual exclusivity” or a “contractual provision”  
26 — rather than leveraging some “special access” to consumers — does **not** constitute unlawful “market  
27 power” proscribed by the antitrust laws. *Newcal*, 513 F.3d at 1050. Finally, either market  
28 imperfections, a change in policy, or fraud and deceit must be alleged “to rebut the economic

1 presumption that ... consumers make a knowing choice to restrict their aftermarket options when they  
2 decide in the initial (competitive) market to enter [a] ... contract.” *Id.*

3 Psystar ignores the critical distinctions made by the Ninth Circuit in *Newcal* (as well as the  
4 Supreme Court in *Kodak*), which show that *Newcal* does not apply to this case. First, and most  
5 significantly, **Psystar does not allege an aftermarket**. Rather, its allegations all concern the primary  
6 market in which consumers buy personal computers with operating systems.

7 Unlike the agreements challenged in *Newcal*, Psystar admits Apple’s Software License  
8 Agreement is part of the initial transaction with consumers. Psystar asserts that from the moment of  
9 their initial purchase Mac OS users are “contractually prohibited ... from installing, using, or running”  
10 Mac OS on non-Apple-labeled computers. Counterclaims ¶ 65; *compare, Newcal*, 513 F.3d at 1048;  
11 *Kodak*, 504 U.S. at 473-478. Thus, as claimed by Psystar, any alleged “market power” Apple  
12 possesses is obtained through “contractual exclusivity” that flows from the Software License  
13 Agreement that was entered in the primary market. Such contractual agreements can neither create  
14 nor be the basis for a single product market when purchasers knowingly and voluntarily enter into the  
15 contract at the time of the original purchase of the product at issue. *Newcal, supra*, 513 F.3d at 1048  
16 (“the law prohibits an antitrust claimant from resting on market power that arises solely from  
17 contractual rights that consumers knowingly and voluntarily gave to the defendant); *Hack, supra*, 237  
18 F.3d at 85 (“Economic power derived from contractual arrangements affecting a distinct class of  
19 consumers cannot serve as a basis for a monopolization claim”); *Maris Distrib. Co. v. Anheuser-*  
20 *Busch, Inc.*, 302 F.3d 1207, 1222 (11th Cir. 2002) (same); *Queen City Pizza, supra*, 124 F.3d at 436;  
21 *United Farmers Agents Assoc., Inc. v. Farmers Ins. Exchange*, 89 F.3d 233, 236 (5th Cir. 1996)  
22 (“Economic power derived from contractual agreements such as franchises or in this case, the agents’  
23 contract with Farmers, ‘has nothing to do with market power, ultimate consumers’ welfare, or  
24 antitrust.”). Accordingly, Psystar’s allegations of market power are precisely the same sort of  
25 “market power” held lawful in *Queen City Pizza* and *Forsyth v. Humana, Inc.*, 114 F.3d 1467 (9th Cir.  
26 1997). *See Newcal*, 513 F.3d at 1050.

27 In addition, Psystar has not claimed any market imperfections (let alone fraud or deceit) that  
28 prevented customers from realizing that Mac OS is only licensed for use with Macintosh computers.

1 *Newcal*, 513 F.3d at 1048-1049; *Kodak*, 504 U.S. at 473-478; *Michigan Division-Monument Builders*  
 2 *of N. Am. v. Michigan Cemetery Ass’n*, 524 F.3d 726, 737 (6th Cir. 2007) (“But a lock-in claim  
 3 requires specific factual allegations in the complaint that the defendant either changed its rules after  
 4 the initial sale was made or concealed its rules from its customers.”). Psystar also does not allege —  
 5 nor can it allege — a change in policy prevented customers from realizing that Apple only licenses  
 6 Mac OS with its Macintosh computers. Indeed, Psystar asserts that any such policy is longstanding.  
 7 (Counterclaims ¶¶ 49-55.) Thus, Psystar has not alleged — and cannot claim — the requirements of an  
 8 “aftermarket” case.

9 Although Psystar relies on “aftermarket” cases in its brief, it has not alleged any such markets  
 10 in its Counterclaims. Rather, Psystar identifies two relevant product markets: “(1) the Mac OS and  
 11 (2) Mac OS Capable Computer Hardware Systems....” (Opp. at 7.) It also alleges that within the  
 12 second of these purported markets there is a “submarket” of Apple-Labeled Computer Hardware  
 13 Systems. *Id.*<sup>2</sup> But the supposed existence of this submarket is irrelevant for three reasons. First,  
 14 defining an economically real “submarket” requires the same specificity and plausibility as defining a  
 15 primary market, which Psystar has not done. *See, e.g., United States v. Oracle Corp.*, 331 F. Supp. 2d  
 16 1098, 1119 (N.D. Cal. 2004) (“Defining a narrow ‘submarket’ tends to require a relatively long  
 17 laundry list of factors, which creates the danger of narrowing the market by factors that have little  
 18 economic basis.”). Second, it is improper to equate “submarkets” with “aftermarkets” as Psystar has  
 19 tried to do here. *Mathias v. Daily News, L.P.*, 152 F. Supp. 2d 465, 483 (S.D.N.Y. 2001), held:

20 The [Plaintiff’s] attempt to establish a “sub-market” by referencing the  
 21 Supreme Court’s decision in *Eastman Kodak Co. v. Image Technical*  
 22 *Servs., Inc.*, 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992),  
 23 also fails. *Eastman Kodak* created a limited exception for a market  
 based on a single brand name when, as a result of an expensive  
 investment in a primary market, the purchaser is locked into an  
 aftermarket of the brand name manufacturer’s products.

24  
 25 <sup>2</sup> Submarkets and aftermarkets are distinct antitrust concepts. Submarkets are subsets of a broader  
 26 primary market. In *Brown Shoe v. United States*, 370 U.S. 294, 325, 82 S. Ct. 1502, 1524, 8 L. Ed. 2d  
 27 510 (1962), the Supreme Court stated the boundaries of a submarket may be determined by examining  
 28 certain enumerated “practical indicia,” which establish the existence of a relevant product market in  
 the first instance. 370 U.S. at 325 (listing “practical indicia”). Aftermarkets, on the other hand, are  
 derivative markets from some primary market and not subsets. *See, e.g., Kodak*, 504 U.S. at 455.

1 Finally, Psystar does not claim any anticompetitive conduct has occurred in the alleged submarket, so  
2 the allegations are irrelevant and do nothing to bolster Psystar's claims.

3 Indeed, Psystar does not identify a single case that has recognized a relevant market limited to  
4 a single brand outside of a *Kodak/Newcal* lock-in claim. Nor can it. As the Supreme Court observed  
5 more than fifty years ago in *United States v. E.I. DuPont de Nemours & Co.*, 351 U.S. 377, 393, 76 S.  
6 Ct. 994, 1006, 100 L. Ed. 1264 (1956), the “power that, let us say, automobile or soft-drink  
7 manufacturers have over their trademarked products is not the power that makes an illegal monopoly.”  
8 *See also, Oracle Corp.*, 331 F. Supp. 2d at 1119 (“[J]udicial rejection of markets narrowly defined to a  
9 single manufacturer's product has been even more pronounced than judicial skepticism about  
10 narrowly defined submarkets.”).

## 11 2. Other Pending Cases Involving Apple Are Irrelevant

12 Similarly inapposite are two Northern District 12(b)(6) rulings issued by Judge Ware — not  
13 the Ninth Circuit<sup>3</sup> — in currently pending cases involving Apple's iTunes® digital music store, iPod®  
14 digital music player and iPhone®. (*See* Opp. at 4, 6, 7; Grewe Declaration.) In *Slattery v. Apple*  
15 *Computer, Inc.*, 2005 WL 2204981 (N.D. Cal. Sept. 9, 2005) (currently pending as *The Apple iPod*  
16 *iTunes Anti-Trust Litigation*, C-05-00037-JW), the plaintiffs **did not allege a single-brand market**.  
17 Rather they made unsupported allegations of tying between Apple's iPod digital music player and its  
18 iTunes digital music store with supposed anticompetitive effects in two alleged multi-brand markets.  
19 Plaintiffs asserted “two separate relevant markets pertinent to [their] claims. The first is the market  
20 for the legal online sale of digital music.... The second market is portable hard drive digital music  
21 players.” *Id.* at \*1. Apple does not agree that these alleged markets exist as defined by plaintiffs.  
22 Nonetheless, they are of no consequence here. The supposed markets in *Slattery* were not single  
23 brand markets and therefore do not help Psystar. *Id.* at \*3.

24 *In re Apple & AT&TM Antitrust Litigation*, No. 144 Civ. 07-05152, slip op. (N.D. Cal. Oct. 1,

25 \_\_\_\_\_  
26 <sup>3</sup> Strangely, throughout its Opposition and the supporting Grewe Declaration, Psystar incorrectly  
27 refers to Judge Ware's 12(b)(6) decisions in the two Apple cases as Ninth Circuit decisions. In fact,  
28 both of the Apple cases cited by Psystar are class action lawsuits that are still in their preliminary  
stages. Very limited discovery has occurred and no dispositive motions have been filed.  
Consequently, there is no finding that Apple has engaged in anticompetitive behavior in either case.

2008), also provides no help to Psystar. There, plaintiffs alleged anticompetitive conduct in purported “aftermarkets” for iPhone voice and data services and iPhone applications. Although Apple believes that there are no legally cognizable aftermarkets in that case, Judge Ware ruled that plaintiffs had adequately pled an “aftermarket” in accordance with *Kodak* and *Newcal*. *Id.* at 14-16. Again, however, this ruling is irrelevant here since Psystar has not pled an aftermarket case. Nor can it, for the focus of Psystar’s counterclaims is the consumer’s initial purchase of a computer with its operating system in the primary market not an aftermarket.

### 3. *Digidyne* Does Not Help Psystar

Psystar’s reliance on *Digidyne Corp. v. Data General Corp.*, 734 F.2d 1336, 1341, 1344 (9th Cir. 1984) is misplaced. Psystar again ignores more recent Supreme Court precedent; this time it is *Illinois Tool Works v. Independent Ink, Inc.*, 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006). In *Digidyne*, the Ninth Circuit found *per se* illegal tying based on a presumption of market power arising from the copyright on defendant’s software. *Id.* at 1341, 1344 (“The RDOS copyright created a presumption of economic power sufficient to render the tying arrangement illegal *per se*”). *Digidyne*, however, has been tacitly overruled by *Independent Ink* in which the Supreme Court held “that, in all cases involving a tying arrangement, the plaintiff must prove that the defendant has market power in the tying product.”<sup>4</sup> *Independent Ink*, 547 U.S. at 46. There is no longer a presumption of

---

<sup>4</sup> Other appellate courts have criticized *Digidyne*. See, e.g., *Will v. Comprehensive Accounting Corp.*, 776 F.2d 665, 673 n.4 (7th Cir. 1985), *cert. denied*, 475 U.S. 1129, 106 S. Ct. 1659 (1986); Note, *The Presumption of Economic Power for Patented and Copyrighted Products in Tying Arrangements*, 85 Colum. L. Rev. 1140, 1156 (1985); see also *Jefferson Parish Hospital District No. 2 v. Hyde*, 466 U.S. 2, 37 n.7, 800 L. Ed. 2d 2 (1984) (O’Connor, J., concurring)). That criticism was acknowledged by the Ninth Circuit in *Mozart Co. v. Mercedes-Benz of N. Am., Inc.*, 833 F.2d 1342, 1346 n.4 (9th Cir. 1987), *cert. denied*, 488 U.S. 870 (1988) (citing *A.I. Root Co. v. Computer/Dynamics, Inc.*, 806 F.2d 673, 676 (6th Cir. 1986)). *Mozart* noted that “[t]wo Justices who favor retention of the *per se* rule against tie-ins would have granted certiorari in *Digidyne* because of the panel’s failure to engage in market analysis.” *Id.* at 1346 n.4. The Ninth Circuit then parted from *Digidyne* in at least two ways: (1) it refused to assume *per se* illegality based on a presumption of market power and suggested the panel in *Digidyne* erred for failing to engage in market analysis and (2) it refused to presume market power from the alleged “uniqueness” of the defendant’s product. *Id.* at 1346. Since *Mozart*, additional courts have criticized *Digidyne* or limited it to its unique facts. See, e.g., *Digital Equipment Corp. v. Uniq Digital Technologies.*, 73 F.3d 756, 762 (7th Cir. 1996); *Town Sound and Custom Tops, Inc. v. Chrysler Motors Corp.*, 959 F.2d 468, 479 n.11 (3d Cir. 1992) (en banc), *cert. denied*, 113 S. Ct. 196 (1992); *Grappone, Inc. v. Subaru of New England*, 858 F.2d 792, 798 (1st Cir. 1988).

1 market power based on copyrights, patents or any other intellectual property. Consequently, Psystar  
2 must actually allege sufficient and specific facts that take into account economic realities and show  
3 market power in a plausible relevant market. It has failed to do so.

4 Not only has *Digidyne* been tacitly overruled, it is also factually distinguishable. Unlike the  
5 plaintiff in *Digidyne*, Psystar has not alleged a “lock-in” theory. (*See* Section II.C.2, *supra*.)  
6 Additionally, in *Digidyne* the defendant admitted that its RDOS was the only viable operating system  
7 that could run on a NOVA CPU. *See Digidyne*, 734 F.2d at 1338, 1341. Here, in contrast, Psystar has  
8 admitted there are operating systems other than Mac OS that can run on Intel microprocessors.  
9 When substitutes do exist, the courts have refused to find the operating system to be a separate product  
10 from the hardware. *See, e.g., Digital Equipment Corp. v. Uniq Digital Technologies*, 73 F.3d 756 (7th  
11 Cir. 1996) (selling operating system software together with a computer is not a tie); *A. I. Root Co. v.*  
12 *Computer/Dynamics, Inc.*, 806 F.2d 673, 675-6 (6th Cir. 1986) (company’s supposed unique OS is not  
13 a relevant market; relevant market is all “small business computers”).

14 Moreover, Psystar cannot plausibly argue there are no other viable operating systems here  
15 when its own computers are able to run Mac OS, Windows XP, Windows Vista and Linux  
16 (Counterclaims ¶ 15). As Psystar fully admits, Apple now uses an Intel microprocessor  
17 (Counterclaims ¶¶ 36-37), instead of the prior non-Intel microprocessor. Consequently, Psystar’s  
18 reliance on *United States v. Microsoft*, 253 F.3d 34, 53 (D.C. Cir. 2001), also is misplaced. Since Mac  
19 OS can now run on Intel processors, Apple’s current Macintosh products, as described in Psystar’s  
20 Counterclaims, would now fall within the *Microsoft* definition of the relevant market: all **Intel-**  
21 **compatible** PC operating systems worldwide. Moreover, the series of *Microsoft* decisions make it  
22 clear that Apple does not have market power. The district court found that “even if Apple’s Mac OS  
23 were included, Microsoft’s share would exceed 80%,” which means that Apple would have had less  
24 than a 20% market share. *Microsoft*, 253 F.3d at 54. Later, the European Commission determined  
25 that Apple had at most 3.9% market share during the time period between 2000 and 2002, and that it  
26 was Microsoft who had market power. (*See* Gilliland Reply Decl., Ex. 1 at ¶¶ 5.2.1, 5.2.1.1 and Table  
27 5.) Hence, Psystar’s antitrust counterclaims are implausible since no court has inferred requisite  
28 market power for a tying claim from a market share below thirty percent after the Supreme Court’s

1 decision in 1984 in *Jefferson Parish Hospital District No. 2 v. Hyde*, 466 U.S. 2, 80 L. Ed. 2d 2  
 2 (1984). 1 ABA Section of Antitrust Law, *Antitrust Law Developments*, 192 & n. 1109 (6th ed. 2007).

#### 3 4. Psystar’s Contradictory Allegations Are Insufficient to State a Claim

4 Psystar argues that the definition of a relevant market is a question of fact, so it should be  
 5 allowed to proceed with discovery to try to prove its implausible, single-brand, primary market. But  
 6 even on a motion to dismiss, courts are not required to accept as true inconsistent allegations or those  
 7 contradicted by documents referred to in the pleading. *Steckman v. Hart Brewing Co.*, 143 F.3d 1293,  
 8 1295 (9th Cir. 1998); *Berry v. Coleman*, 172 Fed. Appx. 929, 932, 2006 WL 759087 (11th Cir. 2006).  
 9 Thus inconsistent allegations, acknowledging viable substitutes exist while at the same time  
 10 attempting to exclude them in defining a relevant market, do not allege a valid relevant market. *See*  
 11 *Tanaka*, 252 F.3d at 1064; *America Channel, LLC v. Time Warner Cable, Inc.*, 2007 WL 142173, at  
 12 \*9 (D. Minn. Jan 17, 2007) (dismissing monopolization claim because the factual allegations did not  
 13 support the plaintiff’s proposed product market of “cable systems” when the plaintiff also alleged  
 14 “there are other MVPD [multi-channel video programming distribution] suppliers that provide  
 15 interchangeable products and who compete with the defendants”); *E&L Consulting, Ltd. v. Doman*  
 16 *Indus. Ltd.*, 360 F. Supp. 2d 465, 472-473 (E.D.N.Y. 2005) aff’d 472 F.3d 23 (2d Cir. 2006) (granting  
 17 Rule 12(b)(6) motion where plaintiffs failed to plead a relevant market “in economically meaningful  
 18 terms” in part because “plaintiffs’ allegations regarding the product market are contradicted by other  
 19 facts set forth in their own complaint”).

20 As noted previously, Psystar itself sells computers with other operating systems in competition  
 21 with the computers it sells with Mac OS. (Counterclaims ¶ 15.) Psystar admits that it “manufactures  
 22 and distributes computers tailored to customer choosing,” including the choice among “**wide range of**  
 23 **operating systems including Microsoft Windows XP and XP 64-bit, Windows Vista and Vista**  
 24 **64-bit, Linux (32 and 64-bit kernels) and the Mac OS.”** (*Id.* emphasis added.) Psystar further  
 25 acknowledges that Apple has competitors by repeatedly referring to “APPLE’s competitors” and  
 26 Apple’s competition, the antithesis of a single-brand market. (*Id.* ¶¶ 15, 22-23, 36-37, 76.) Psystar  
 27 alleges that Apple “allow[s] (and all but invit[es]) others to run a **competing OS** on a Macintosh” (*Id.*  
 28 ¶ 56, emphasis added), and by “competing OS” Psystar clearly is referring to Windows (*Id.* ¶ 55). It

1 also alleges that Apple’s customer loyalty “far outranks its closest competitor.” (*Id.* ¶ 38.) Psystar  
 2 specifically notes Apple’s substantial advertising campaign directed to its competition from Microsoft  
 3 Windows. (*Id.* ¶¶ 34-35; Request for Judicial Notice Ex. B.) These allegations acknowledge that  
 4 Apple competes in a market broader than its own brand and require the conclusion that Psystar cannot  
 5 allege a viable antitrust claim.

6 Notwithstanding its admission that Apple has competitors, Psystar argues it should be allowed  
 7 to proceed with its evidence that there is little “elasticity of demand” between Apple’s Mac computers  
 8 with their Mac OS and other personal computers running the Windows operating system, citing *Theme*  
 9 *Promotions, Inc. v. News America Marketing FSI*, 539 F.3d 1046 (9th Cir. 2008). *Theme Promotions*  
 10 repeated the truism that cross-elasticity of demand for a product helps define the relevant product  
 11 market. (*See* Counterclaims ¶¶ 36, 37, 43.) This does not help Psystar, however, because its cross-  
 12 elasticity allegations – regarding the price of **computers** – have no bearing on the elasticity of demand  
 13 for operating system **software** alone. These allegations, even if true, do not help show a single-brand  
 14 market limited to Mac OS software since the prices quoted relate to hardware with operating systems,  
 15 not operating systems alone.

16 **D. Psystar Tacitly Acknowledges Apple’s Right To Refuse To Help A Competitor**

17 Psystar fails to provide any authority that counters Apple’s legal right to decide how it  
 18 distributes its product and with whom it may choose to license or not license the product. While  
 19 Psystar discusses the facts of *Trinko*, it fails to address or refute the longstanding general principle that  
 20 “the Sherman Act ‘does not restrict the long recognized right of [a] trader or manufacturer engaged in  
 21 an entirely private business, freely to exercise his own independent discretion as to parties with whom  
 22 he will deal.’” *Verizon Commc’n v. Law Offices of Curtis V. Trinko, LLP*, 540 U.S. 398, 408, 124 S.  
 23 Ct. 872, 879, 157 L. Ed. 2d 823 (2004). Thus, courts have not forced licensing based on purported  
 24 monopolization or other antitrust theories in copyright or patent cases. *See, e.g., Data General Corp.*  
 25 *v. Grumman Systems Support Corp.*, 36 F.3d 1147, 1187 (1st Cir. 1994) (affirmed summary judgment  
 26 dismissing antitrust counterclaims premised on Data General’s refusal to license its copyrighted  
 27 software to a direct competitor); *In re Independent Service Orgs. Antitrust Litig. CSU, L.L.C.*, 203  
 28 F.3d 1322, 1327 (Fed. Cir. 2000) (following *Data General*); *SCM Corp. v. Xerox Corp.*, 645 F.2d

1 1195, 1209-10 (2d Cir. 1981) (refused to force Xerox to license its patented photocopiers that were  
2 deemed superior). Based on these principles, courts properly have dismissed complaints seeking such  
3 relief on Rule 12(b)(6) motions to dismiss. *See, e.g., Schor v. Abbott Labs.*, 457 F.3d 608, 610-11,  
4 614 (7th Cir. 2006) (even when dubious factual allegations regarding market power are assumed to be  
5 true, it was proper to dismiss a monopolization claim because the patent holder has the right to  
6 exercise its discretion on how to distribute its patented invention).

7         Instead of addressing these cases, Psystar contends that Apple has “subverted” the true issues  
8 of Psystar’s counterclaims. There is no doubt, however, that Psystar seeks an injunction forcing Apple  
9 to allow Psystar to put Apple’s proprietary Mac OS on Psystar’s computers as an option along with  
10 Windows and Linux products, so Psystar can sell those computers in competition with Apple. (*See*  
11 Counterclaims ¶15 and Prayer for Relief). This would require Apple to help Psystar compete against  
12 it, in direct contradiction to *Trinko*.

### 13         **E. Psystar’s State Law Claims Are Irreparably Flawed and Should Be Dismissed**

14         Psystar has not pled a violation of any law in its Fourth, Fifth and Sixth counterclaims, nor has  
15 it provided any legal authority for maintaining its Cartwright Act claims in the absence of a violation  
16 of the federal antitrust laws.

#### 17                 **1. Psystar’s Cartwright Act Claim Should Be Dismissed**

18         While contending that the elements for federal and state law claims are distinct, Psystar fails to  
19 provide any independent basis or authority to support its Cartwright Act claim other than what serves  
20 as the basis for its Sherman Act claims. Psystar alleges tying, unilateral monopolization and exclusive  
21 dealing to support its Cartwright Act claim. (*See* Counterclaims ¶¶ 115-116.) Yet, the law is clear: a  
22 Cartwright Act claim cannot be based on unilateral monopolization. *Dimidowich v. Bell & Howell*,  
23 803 F.2d 1473, 1478 (9th Cir. 1986). Moreover, Cartwright Act claims based on tying and exclusive  
24 dealing require definition of a relevant market. *See, e.g., Corwin v. Los Angeles Newspaper Service*  
25 *Bureau, Inc.*, 4 Cal. 3d 842, 856-858 (Cal. 1971) (tying claim requires defining relevant markets);  
26 California Business and Professions Code §16727 (alleged exclusive dealing must “substantially  
27 lessen competition or tend to create a monopoly,” hence requiring the definition of a relevant market).  
28 *Corwin*, 4 Cal. 3d at 853. As discussed *supra*, Psystar has failed to allege a legally cognizable

1 relevant market. Accordingly Psystar’s Cartwright Act claims fail.<sup>5</sup>

2 **2. Psystar’s Business and Professions Code Claim Should Be Dismissed**

3 Psystar does not dispute that its California Business and Professions Code Section 17200  
4 claims fail under the “unlawful” prong if its antitrust claims fail. (*See* Opp. at 14); *see also Aguilar v.*  
5 *Atlantic Richfield Co.*, 25 Cal. 4th 826, 866-867 (Cal. 2001) (no §17200 claim under “unlawful” prong  
6 where Cartwright Act claim fails). Rather, Psystar incorrectly argues that its §17200 claim survives  
7 under the “unfair” prong of California Business & Professions Code Section 17200 based on its  
8 antitrust allegations. Since *Cel-Tech Communications v. Los Angeles Cellular Tel. Co.*, 20 Cal. 4th  
9 163 (Cal. 1999), however, California courts have ruled that there is no claim under the unfair prong of  
10 Section 17200:

11 If the **same conduct** is alleged to be both an antitrust violation and an  
12 “unfair” business act or practice for the same reason—because it  
13 unreasonably restrains competition and harms consumers—the  
14 determination that the conduct is **not an unreasonable restraint** of  
15 trade necessarily implies that the conduct is **not “unfair”** toward  
16 consumers. To permit a separate inquiry into essentially the same  
17 question under the unfair competition law would only invite conflict and  
18 uncertainty and could lead to the enjoining of procompetitive conduct.  
19 (*See Cel-Tech, supra*, 20 Cal. 4th at 185.)

20 *Chavez v. Whirlpool Corp.*, 93 Cal. App. 4th 363, 375 (Cal. Ct. App. 2001) (emphasis added); *RLH*  
21 *Indus., Inc. v. SBC Commc’n, Inc.*, 133 Cal. App. 4th 1277, 1286 (Cal. Ct. App. 2005) (rejecting  
22 plaintiff’s argument that conduct “threaten[ed] an incipient violation” of the antitrust laws where  
23 Cartwright Act claims failed). Psystar has not alleged any conduct or asserted any legal claim that  
24 reaches beyond the antitrust laws. Accordingly, if Psystar’s antitrust claims fail, so too must its  
25 Section 17200 claim.

26 **3. Psystar’s Supposed “Common Law Unfair Competition” Claim Should Be Dismissed**

27 Psystar confuses **statutory** unfair competition with **common law** unfair competition in its  
28 opposition brief in an effort to keep its sixth counterclaim alive. Common law unfair competition is a

---

29 <sup>5</sup> Moreover, even if the Court finds some legally cognizable relevant market has been adequately  
30 defined in the context of a motion to dismiss, Psystar’s monopolization and exclusive dealing claims  
31 must be dismissed for failure to allege a combination as required by the Cartwright Act.

1 narrow doctrine in trademark law relating to the “passing off” of goods and services. (Motion at 16.)  
 2 It does not include the alleged statutory unfair competition claims and alleged antitrust violations that  
 3 Psystar asserts in its common law counterclaim. Psystar’s effort to expand the scope of common law  
 4 unfair competition was rejected by Psystar’s own authority in *Aydin Corp. v. Loral Corp.*, 1981 WL  
 5 2178, at \*18 (N.D. Cal. 1981), where Judge Patel rejected the plaintiff’s assertion that its Cartwright  
 6 Act and tortious interference claims could be the basis for common law unfair competition. *See also*,  
 7 *Ojala v. Bohlin*, 178 Cal. App. 2d 292 (Cal. Ct. App. 1960). The other authorities cited by Psystar  
 8 also do not support its argument. *See Golan v. Pingel Enter., Inc.*, 310 F.3d 1360, 1373 (Fed. Cir.  
 9 2002) (held that issues of state or common law exist in the context of a trademark claim, not antitrust);  
 10 *Karl Storz Endoscopy-Am., Inc. v. Surgical Techs., Inc.*, 285 F.3d 848, 853 (9th Cir. 2002) (notably  
 11 did not include any reference to common law unfair competition); *Imax Corp. v. Cinema Tech., Inc.*,  
 12 152 F.3d 1161 (9th Cir. 1998) (addressing claims based upon common law misappropriation of trade  
 13 secrets, not antitrust).

### 14 **III. CONCLUSION**

15 Psystar’s allegations fail to state viable antitrust or unfair competition claims. Rather, they  
 16 demonstrate that there is no single-brand relevant product market. Consequently, those allegations are  
 17 insufficient to state a claim that Apple has market power of any sort or that its actions violate any  
 18 federal or state law. Psystar’s Counterclaims are simply an attempt to obscure Psystar’s violations of  
 19 copyright and trademark laws and its breach of Apple’s Software License Agreement. The  
 20 Counterclaims should be dismissed with prejudice.

21  
 22 DATED: October 23, 2008

Respectfully submitted,
